TYPICAL FEATURES

Fully predefined, homogeneous document displaying rules, applying in any conditions

Design of pricing and credit policy rules, based on an open, multidimensional model that fully covers complex business requirements

Design of letters of credit, using an open and fully configurable, multidimensional model

Efficient Expected/Reserved orders management, providing inventory updates based upon customization

Covering business requirements for any type of enterprise (3-level features for serving business needs such as: Color-Size, Storage Shelves, Product Lots, Serial Number, Routes and Means of Transport, Multiple Barcodes, Payment Methods and Settlements, Composition-Decomposition of item sets etc.)

Powerful warehouse stock valuation cost system, featuring seven (7) different valuation methods (FIFO, LIFO, Average cost price and other commonly used valuation methods)

Efficient shortage management process (directly connected to budget scenarios) that automates order taking for product items, setting minimum quantity safety levels as well as suggesting reordering levels for instant response to production needs

Integration with core Soft1 ERP functional modules (CRM, Budgeting, Financial Management, Sales and Production Management)

Complete monitoring for offers along with the ability to create new offer based on a precious offer (new-version-offer)

Extensive business reports, available in alternative display modes (tax liabilities, statistical information, BI scenario analysis, customer purchasing behavior)

Soft1 ERP offers everything your business needs to reduce its operating cost and improve its effectiveness

Rich functionality

Innovative Cloud operation

Advanced Enterprise Mobility solutions

Alternative operational methods (user licenses or subscription service)

Low TCO (total cost of ownership)

Easy implementation and high scalability

Fast business process adaptation

Easy integration with other systems

Value-added services from certified partners
